Objective

Enthusiastic and detail-oriented web developer with foundational knowledge in HTML, CSS, and JavaScript. Eager to contribute to marketing operations and web development at Accenture. Passionate about building scalable and user-friendly web pages, with hands-on project experience and a strong interest in digital marketing technologies..

Education

Sathyabama University , BSc in Computer Science 2022 – 2025

- GPA: 7.12 / 10.0

Higher Secondary Education 2021 – 2022

- Kalaimagal Higher Secondary School, Vadamadurai

Secondary School Leaving Certificate 2018 – 2019

- John Paul Higher Secondary School, Dindigul

Technical and Web Development Skills

Web Technologies

- **HTML**
  Strong command of semantic HTML for creating structured, accessible, and standards-compliant web pages. Experience in building responsive layouts, forms, tables, links, and media embedding for use in web and email interfaces.
- **CSS**
  Working knowledge of styling techniques, including layout formatting, typography, color schemes, and box model. Basic understanding of responsive design using Flexbox and Grid.
- **JavaScript**
  Basic understanding of scripting interactive elements like button clicks, form validation, and DOM manipulation. Currently enhancing JavaScript skills to build dynamic content.

Email and Web Page Development

- **E**xperience developing static web pages and basic email templates using HTML and inline CSS.
- **U**nderstanding of email design constraints (table-based layouts, inline styling, and cross-client compatibility).
- **E**xposure to creating user forms and integrating basic interactivity.

Tools and Platforms

- **Visual Studio Code:**Primary development environment for web projects, equipped with extensions for HTML/CSS linting and live preview.
- **Git and GitHub:** Basic version control skills for managing project code, maintaining repositories, and collaborating on development work.
- **Python IDEs:** Use of IDLE, PyCharm and VS Code for backend scripting and integration tasks.

Databases and Backend Technologies

- **MySQL:** Familiar with database concepts and executing simple SQL queries for data retrieval and storage.
- **Flask (Python Microframework):** Experience building lightweight backend applications to support web projects. Hands-on with routing, form handling, and Jinja templating.

Projects

- **Garbage Detection System (Academic Project)**

  GitHub: Muthukrishnan-R/AI-Litter-Detection-System

  Built an AI-powered system to detect and report vehicle littering in real-time. Used object detection, OCR, and face recognition to identify violators and notify vehicle owners via SMS. Learned practical AI integration for solving real-world problems.

- **Responsive HTML Email Template**

  GitHub: Muthukrishnan-R/html-email-template

  Built a professional and responsive email template using pure HTML and inline CSS. Designed for marketing use cases, including personalized messages and call-to-action buttons. Focused on cross-client compatibility and accessibility for email campaigns.

- **Personal Portfolio Landing Page**

  GitHub: Muthukrishnan-R/landing-page-portfolio

  Developed a static, mobile-friendly landing page using HTML and CSS, featuring personal introduction, project highlights, and social links. Practiced clean coding practices and responsive layout principles to showcase frontend skills.

Certifications

- Python – Hacker Rank
- Data Science – Infosys Springboard
- Natural Language Processing – Infosys Springboard
- Webinar: Data Science vs. Data Engineering vs. Data Analytics
- Industrial Visit – NSIC (The National Small Industries Corporation)

Participation & Activities

- IEEE Member
- Member of Hack Sist Club
- Organizer of webinars and technical events
- Participated in college-level design and outreach activities
